

Healing heARTs Candle Project  
Decorate a candle holder for a battery operated candle!

Materials Provided:

1 Battery Operated Candle  
1 Silver Cup  
1 Gold Wooden Circle  
25 Mini Glue Dots  
Assortment of about 40 Sequins

Instructions:

- 1) We suggest watching our easy video instructions at [www.hharts.org](http://www.hharts.org).
- 2) Remove the white paper backing from one glue dot square. The glue dot will be stuck to the clear plastic. Press the plastic and glue dot onto the X on the base of the silver cup. The glue dot should stick to the cup. Peel away the clear plastic (you may need to use your fingernail to separate the clear plastic from the glue dot). Repeat with 2 other glue dots on the same X. Stick the silver cup (X side down) onto the middle of the gold circle. Firmly press the silver cup and gold circle together.
- 3) Choose sequins to decorate your gold circle around the silver cup. The number, color and shape of sequins which you pick depends on how you want to your candle holder to look.
- 4) Remove the white paper backing from one glue dot square. The glue dot will be stuck to the clear plastic. Firmly press a sequin onto the glue dot. Peel away the clear plastic from the glue dot and sequin (you may need to use your fingernail to separate the clear plastic from the glue dot and sequin). Firmly press the sequin and glue dot onto the gold circle around the metal cup. Repeat with more sequins and glue dots until your candle holder looks the way you want it to!
- 5) Turn on your battery operated candle using the black switch on the bottom. Place the candle in the silver cup.

Enjoy!!
